

Как можно удалить файл с отменой удаления (перемещение в Корзину Windows)?

```
{ Thanks to Poul Dige for this comment:  ALWAYS make sure, that FileName ends
with two chr(0), i.e.  FileName := FileName+#0+#0;  If you want to process more than one
file, the file names  should be separated by a single #0, e.g.  FileName :=
File1+#0+File2+#0.....+FileN+#0+#0;}  uses  ShellApi;  function
DeleteFileWithUndo(FileName: string): boolean;  var  SHFileOpStruct: TSHFileOpStruct;
begin  FillChar(SHFileOpStruct, SizeOf(SHFileOpStruct), 0);  with SHFileOpStruct do
begin  { specifies the operation }  wFunc := FO_DELETE;  { specifies the filename to
operate }  pFrom := PChar(FileName);  { flags for controlling the operation }  {
Preserves undo information, Responds with yes to all  for any dialog box that is displayed,
doesn't display a  progress dialog }  fFlags := FOF_ALLOWUNDO  or
FOF_NOCONFIRMATION  or FOF_SILENT;  end;  { returns true if successful,
otherwise false }  result := (0 = ShFileOperation(SHFileOpStruct));  end;
```
